

ExpressFood—Use Case Scenario/Diagram

Every day chef choose 2 main dishes and 2 desserts in the system.

Client view Daily Menu in the web page . Client can choose one or multiple dishes and desert from the daily menu and put them in the shopping cart.

The Order STATUS => Pending.

Client can register to the system (as a new client) or login if it is an existing customer.

Client submit the order . Order STATUS => Ordered.

Client is redirected to the payment gate. If payment completed go from stats “ in process” => “payment Proccesed”.

If payment is not completed successfully, paymet status is “ Payment failed” and the client repeat the payment process.

Order STATUS => In Process. The client is redirected back to the page where there is a view area of estimated time of arrival.

The Order goes to the Delivery Boy. When the Order arrived to the client the Order Status is change to Delivered by the Delivery Boy. The delivery time must be less than 20 minutes.

Order Status => Completed.
